

# C100 Wheel Balancer

All wheel balancers supplied by Concept Garage Equipment have been designed and manufactured with durability, affordability and safety in mind.

Our C100 wheel balancer has been designed to be busy and to fit in confined spaces. This wheel balancer is ideal for mobile tyre vans or smaller workshops. This is a great alternative to one of our motorised wheel balancers from our range. The C100 is also a great cost saver in terms of being a manual spin with no need for a motor. This machine is a hand operated machine but still comes with additional features that you would expect in a wheel balancer costing significantly more. This machine benefits from a two-year parts and labour warranty giving you the confidence that you are purchasing a reliable wheel balancer.

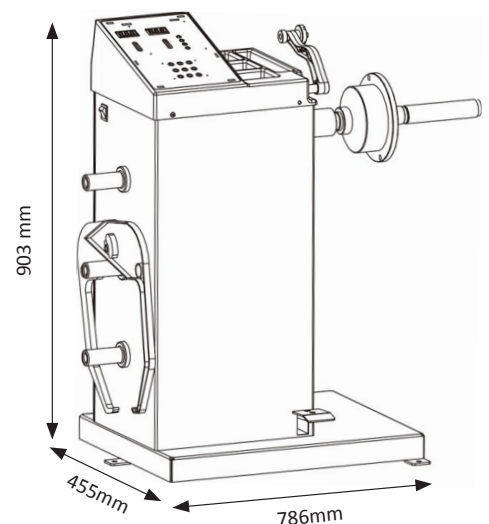

All our wheel balancers have been tested and certified to CE standards.

## FEATURES

- Manual spin
- Manual width and distance measuring
- ALU balancing mode at 9 o'clock or 12 o'clock positions to add balance weights
- Statistic and dynamic balancing, 7 ALU mode programs for alloy rims or special shaped rims
